

Danish Malhi

Software Developer | Full-Stack Developer (Node.js)

dkmalhi2004@gmail.com • Karachi, Sindh • 03363547482

GitHub: github.com/DanishMalhi556

Software Developer skilled in C++, Java, Python, and full-stack web development, with hands-on experience in building scalable web applications using Node.js and Express. Proficient in developing RESTful APIs and responsive user interfaces. Strong foundation in data structures, object-oriented programming, and database systems with a focus on clean and maintainable code.

Skills

Programming Languages

C++, Java, Python, Javascript

Web Technologies

HTML, CSS, Node.js, Express

Databases

SQL Server

Tools & Platforms

Git, VS Code

Concepts

OOP, Data Structures, REST APIs

Education

Iqra University, Karachi

March 2023 - Present

Software Engineering

Projects

• DCCN Project (Data Communication & Computer Networks)

Designed and implemented a network model demonstrating core data communication principles
Configured network topology using routers, switches, and end devices in Cisco Packet Tracer
Implemented IP addressing and subnetting for efficient network segmentation
Configured VLANs and inter-VLAN routing to enable communication between multiple network segments
Applied TCP/IP protocols and performed packet-level analysis to understand data transmission
Simulated and tested network performance, identifying and troubleshooting connectivity issues

• Employee Payroll System (SQL Server)

Designed and implemented a relational database for employee payroll management
Wrote SQL queries for salary calculation, record management, and reporting
Applied normalization techniques to reduce redundancy and ensure data integrity
Managed relationships using primary and foreign keys for efficient data retrieval

• ATM Simulation (Python)

Developed a command-line ATM system to simulate real-world banking operations
Implemented features including balance inquiry, withdrawal, and deposit handling
Utilized functions, loops, and conditional logic for efficient transaction processing
Organized code into modular functions to improve readability and reusability

• Kirshana Painters Website (Full-Stack)

Developed a full-stack web application using Node.js and Express for backend services
Built a responsive frontend using HTML, CSS, and JavaScript with optimized UI/UX
Designed RESTful APIs to handle client-server communication efficiently
Structured the application using MVC architecture for scalability and maintainability
